

LOOKING FOR A REWARDING ROLE IN GENERAL PRACTICE?

Symphony Healthcare Services (SHS) is a rapidly growing NHS Primary Care organisation in Somerset. We are utilising our new care models to meet changing patient needs and transforming local healthcare services.

To support our continued growth, we have a new range of GP opportunities from newly qualified roles, to clinical leadership and specialist positions.

- Highly flexible, employed GP roles are available, including sessional, remote and home working opportunities.
- Develop your own portfolio role across primary and acute care settings, to suit your clinical interests and experience.

SHS was launched in April 2016 as part of the Symphony Programme vanguard. Since then, we have rapidly grown to support a network of 10 GP practices, providing personalised care for over 68,000 patients.

Join our team of GPs and experienced clinicians as part of a multi-disciplinary approach to help drive innovation and improve patient services. Additional training and career progression opportunities are available.

A competitive remuneration package is available based on the BMA GP contract and pay scale linked to national pay awards, plus additional incentive payments and allowances for clinical specialist skills or leadership roles.
