## SNOMED CT Awareness Session

### A Half Day Workshop

**Course Objectives:** **SNOMED CT** stands for “Systematised **N**omenclature of **M**edicine - **C**linical **T**erms” and is a common clinical language that will replace Read codes within the NHS.

This workshop will give delegates a clear understanding of both the transformational and transactional elements of this change, providing a strategic overview of ‘why’ and an operational understanding of ‘how’ to meet the deadline for all GP practices to have transitioned, both Read v2 and CTV3, to SNOMED CT **before 1<sup>st</sup> April 2018**.

Delegates will develop a clear action plan so they understand what this means for their practices, what is likely to happen automatically and what they are likely to need to do for themselves.

**13.15** Tea/Coffee

**13.30** Welcome, introductions and objectives

Why the change?

What will happen, when and how?

What does SNOMED CT look like?

**15.00** Tea/Coffee

**15.15** Differences between SNOMED CT and Read codes

Finding terms in SNOMED CT

Preparing for the transition

Developing your action plan

**16.15** Questions and Close
