Introduction

Infection Prevention Solutions was formed in response to the requirements of the health and social care sector enabling those service providers without in-house comprehensive Infection Control training, to meet the statutory requirements of both the Department of Health and Care Quality Commission relating to Infection Prevention and Control standards. The company provides a unique pro-active specialist Infection Control service training service for all sectors in health care.

The company is clinically managed by Ms Dee May RGN, DMS, Clinical Director, an internationally recognised Infection Control specialist nurse with over 30 years experience in the field. The company employs a wide range of full time and flexible staff with experience across the full range of health and social care environments. All staff are specialist infection control nurses and all have relevant infection control qualifications (ENB 329, Diploma / Degree in Infection Control) and relevant teaching qualifications. Additional credentials include:

- All **our** clinical staff have undergone enhanced DBS Checks (Disclosure Barring Service) previously known as **CRB**
- Full **Professional Indemnity** cover for all **our** professional staff to conduct infection control services
- The company is fully accredited in **BS ISO 9001:2008**
- All **our** Link Practitioner courses are fully accredited with the **Royal College of Nursing**

The Company currently provides services under contract to a wide range of NHS Trusts, and independent sector healthcare providers.

References are available on request.

Some of Our Experience

- A national Hygiene audit for a European contract – over 300 Care Homes & Mental Health audits undertaken throughout the Republic Of Ireland.
- Managing IPC services at a large London acute Trust leading to improvements in care which contributed to a reduction of hospital-acquired infection rates (*C.difficile*) of circa 50%
- We have provided specialist ICNs to some of the largest teaching hospitals and acute and primary care Trusts in London and the SE.
- Responsible for the infection control training of all staff groups at four large acute NHS trusts to meet annual training needs
- Over 20,000 infection control audits undertaken in the last eight years
- Over 1,800 audits completed in dental practices to the standards of HTM01-05 for decontamination
- The largest infection control database, managed by clinical experts – the basis for our innovative audit (ICAT) products
- Development of ICAT (Infection Control Audit Technology) – our own in-house audit solution, designed and managed by infection control specialists and now available for client use and widely used and licensed to the NHS and independent sector
- Care home audits for one of the largest primary care trusts in the UK producing reports for 220 facilities
- Collaborative training project with the Health Protection Agency undertaking social care training for all staff groups across 4 London boroughs
- Currently hold contracts with a wide range of small and medium-size Care Homes Groups
- Provision of comprehensive policy and guideline manuals for a wide range of health and social care providers to meet Care Quality Commission (CQC) requirements
- Development of a unique monthly service package for care homes allowing them to outsource elements of infection control to comply with CQC registration requirements (Outcome 8)
- RCN Accredited Infection Control Link Practitioner Training for IPC leads/links – In House and private courses for health and social care staff
- Providing Infection Control specialists on contract to :
 - Mental Health providers – both NHS and independent sector
 - Individual Care Homes and Care Home Groups
 - Patient Transport Services – both NHS and independent sector
 - Acute NHS Trusts and Primary Care commissioners and providers
 - Independent and NHS dental providers
 - Working closely with many CCG's
